

Fire Retardant Black Plastic Cabinet with Silver Trim
 Dual Power Settings
 - 750 watt / 1500 watt
 Heats up to 1000 sq ft
Suggested Retail: \$629
Price: _____

Standard Product Features

- Infrared element life enhanced to 30,000 hrs
- Full-function remote control
- Accurate electronic thermostat, 37-86 °F
- Delay start timer & automatic restart after power outage
- Easily replaceable heating elements & parts, eliminating down-time
- Calibration capability to calibrate the heater to the main house thermostat
- Quality-built, attractive cabinet.
- 3-Year limited warranty.

BioSmart® far infrared heaters represent the most advanced technology & efficiency in home heating systems. BioSmart® Heaters perform and function so remarkably that when you experience the therapeutic benefits of a BioSmart® Heater for 30 days you will agree that this is one of the best investments you have made all year.

BioSmart® Quartz Far Infrared Heaters

BioSmart® Classic Edition

Why choose BioSmart® as a supplemental heat source?

Economical: Up to 50% savings in energy costs over other heating sources. Your BioSmart® heater can pay for itself in as little as two months with zone heating.

Therapeutic: Far infrared radiant heat provides health benefits not obtainable from other heat sources.

Quiet, Energy Efficient, Reliable: Proprietary far infrared heating elements, advanced electronics, and quality construction make BioSmart® heaters the best value for your money.

BioSmart® Far Infrared
 Supplemental Heat Source

Attributes of Infrared Heat

Cost Effective—Infrared heat is a naturally occurring form of radiant energy that is more penetrating than conventional heat due to its shorter wavelength. It heats objects and bodies directly, much like the sun, rather than just heating the air. Dollar for dollar, the BioSmart® infrared heater can heat a larger area faster, more evenly, and more efficiently than any other heating source.

Comfortable—As much as 80% of the heat produced by an infrared heater is absorbed by the objects & water molecules in the room, so the heat is retained longer instead of quickly dissipating out cracks & poorly insulated areas. Humidity is preserved, creating a softer, moister heat that is easier on the skin and respiratory passages. This is why you feel more comfortable in a room heated with infrared heat.

Energy Efficient—Infrared heat waves distribute heat evenly, floor to ceiling & wall to wall. This can save up to 50% in energy costs. This remarkable attribute of infrared heat has been demonstrated in thermograph videos and evaluation studies.

Health Enhancing—The BioSmart® heater emits infrared heat waves in the therapeutic far infrared range. Far Infrared heat provides many of the health benefits of natural sunlight, without the dangerous effects of UV radiation. Customers have reported reduced muscle and joint pain & stiffness, as well as improved respiratory function. Far Infrared heat is also found in a variety of healing modalities, including cancer therapy, with very successful results.

BioSmart® Classic Edition Model 1500PC

Heater Specifications:

Cabinet: ABS 94-VO fire retardant plastic - Black with silver trim

Weight: 21 lbs

Dimensions: 14" x 13 1/2" x 16 1/2" (HWD)

Power Requirements: 115 Volt AC, 1500 Watt/750 Watt

Dual Power Settings: 1500 Watt (Hi) / 750 Watt (Lo)

Power Cord: 6 ft, 14 gauge

Cord Storage: Convenient cord wrap for transport and storage

Thermostat: Two probe—Electronic Digital

Accuracy: ±1 degree

Listed Approvals: cTUVus (International UL Equivalent)

Delayed Start Function: Can be delayed up to 24 hours

Auto Restart: Automatically resumes heating after a power outage

Remote Control: Credit card sized with a large button surface

Safety Cut-off: Yes

Pre-Filter: Life-time Electrostatic

Heat Type: Therapeutic Far Infrared Heat

Heating Elements: Four (4) quartz infrared emitters with a life expectancy rated at 30,000 hours

Dual Speed, High-Output Fan: Ultra quiet, ball-bearing laminar-flow fan

Warranty: Limited 3-Year

Features Found Only in the BioSmart® Classic Edition

The new Classic Edition features insulating ceramic plates in the newly improved heating chamber for added noise suppression and heat retention, an ultra quiet powerful fan, and larger, more efficient 120 volt quartz infrared heating elements, enhanced to a 30,000 hour lifespan. This combination produces 25% more heat than any competing infrared heater brand.

Dual power settings and fan speeds provide greater versatility and noise reduction. The thermostat is accurate to 1 degree with a range of 37-86°F and can be calibrated to match the house thermostat.

Electronic features include a delay start timer, and automatic re-start feature in case of a power outage, an LED temperature display, and a full function remote control.

Design & Serviceability Features

The BioSmart® Classic Edition heater's design incorporates owner-friendly serviceability features not found in other portable heaters. In the unlikely event that a component must be replaced, the BioSmart® heater is designed for complete component replacement in just a few minutes. Parts are always available through BioSmart Technologies or our network of dealers and distributors.

Built to Last

BioSmart® infrared heaters feature a high quality sold-state modular design, packed with many innovative features and built to provide years of dependable service.
